In-House Periodontal Service

We are delighted to introduce our new Specialist in Periodontics, Dr Mei Huang, who has recently joined our team at Country Dental in Hythe.

We are excited to expand our services and expertise to better serve our patients and referring dentists.

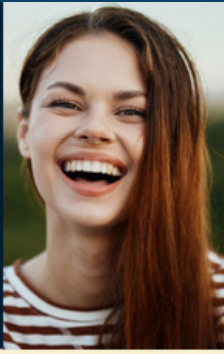

Online booking has arrived at Country Dental!

Currently, exams can be booked online and we will be extending this to hygienist and treatment appointments.

Mei focuses on the prevention and management of gum disease (periodontitis), peri-implant conditions, and periodontal reshaping procedures.

She accepts referrals for a wide range of periodontal treatments, providing care based on the latest clinical guidelines and research.

Refer and receive a **£20 M&S voucher***

[Find out more](#)

Existing patients can refer a friend /relative and you will both receive a £20 M&S voucher after their New Patient appointment. T&Cs apply - for full T&Cs please use the link

Goodbye.....
After years of caring for your smiles, Sally is hanging up her drill and heading into a well earned retirement. We wish her well in her next chapter.

Try our new Airflow

We are delighted to announce that we now have Airflow in the Practice, a modern, non-abrasive teeth cleaning method that uses a mixture of air, warm water and fine powder to remove surface stains and plaque. It is a gentler alternative to traditional scaling and polishing with superior stain removal.

We aim to provide a calming and relaxed atmosphere for all.

We work with very nervous and phobic patients, guiding them through their dental journey with patience and care. It can take time but sometimes the most nervous of patients enjoy (almost) coming to see us!

Our staff's contentment is very important to us. We want everybody to feel valued, safe and happy at work. A happy team is essential for creating the comfortable atmosphere in the Practice that we aim for.
